Task1: Create a Digital Literacy Awareness Infographic

For this task, I created a Digital Literacy Awareness Infographic using Canva. The infographic covers key topics such as the definition of digital literacy, safe internet practices, and the importance of maintaining a professional online presence. I used simple icons, short text, and attractive colors to make the design visually engaging and easy to understand. The goal was to make it useful for students who are new to digital tools.

One interesting aspect of this task was learning how to present information visually instead of writing long paragraphs. However, I found it slightly challenging to organize all the information within a single page while keeping it neat and readable. Overall, this task improved my creativity and design skills and helped me understand how visual communication plays an important role in spreading awareness.
